

CCL-FORENSICS CAPABILITY STATEMENT COMPUTER FORENSICS

Media

CCL-Forensics can secure and analyse data from the following:

- Computers - PCs, laptops, servers, Apple Mac, LINUX/UNIX
- Computer media – CD, DVD, tape
- Removable media – e.g. Secure Digital, Compact Flash, Memory Stick
- Personal Digital Assistants (PDAs) & electronic organisers
- Satellite navigation systems
- Games consoles

Services

In relation to these media, CCL-Forensics offers the following services:

1) Initial Assessment (Preview)

- Initial investigation to determine if there is relevant evidence present
- Findings report indicates the nature and extent of any evidence identified
- An effective way of reducing volume of work by eliminating irrelevant items

Standard service from receipt of data = 5 working days

2) Detailed Analysis

- Analysis of the suspect media to identify and produce any material related to the matter under investigation
- Includes the recovery of deleted data, email & internet activity, graphical & multimedia files and metadata
- A detailed report or witness statement is produced together with copies of evidential files where appropriate

Standard service from receipt of data = 28 working days

Additional Support

- Secure Collection and Delivery anywhere in the UK mainland by an employed security cleared driver in an unmarked vehicle
- On-Site and Covert Attendance if necessary to image the media
- Telephone advice and guidance from a dedicated Account Manager
